5th Reinhold Ganz Lecture
May 7th, 2015
Balgrist University Hospital Zurich, Switzerland

«Things that matter most:
Professionally and Personally»

Bernard F. Morrey, MD
**The Reinhold Ganz Lecture**

Reinhold Ganz has opened a new era of understanding and more importantly so of treatment of hip disease. As a Chair of the Department of Orthopaedics of the University of Berne he has fostered academic orthopaedic excellence and educated a generation of orthopaedic surgeons. As a Consultant at the Department of Orthopaedics of the University of Zurich from 2004 to 2007 he has served as a role model in analyzing and treating orthopaedic problems and substantially contributed to the development of the Department. In recognition of his past and present contributions, «The Reinhold Ganz Lecture» was created in 2010. The Department of Orthopaedics of the University of Zurich will be organizing the fifth «Reinhold Ganz Lecture» which will take place on May 7th, 2015.

**Bernard F. Morrey, MD**

Bernard F. Morrey is Professor and Chair Emeritus of the Department of Orthopaedics at the Mayo Clinic. He continues to serve as a Professor of Orthopaedics at both the Mayo Clinic and the Department of Orthopaedics at the University of Texas in San Antonio.

Dr. Morrey grew up in Texas, worked as a space engineer, went to Medical School and then through residency at the Mayo Clinic in Rochester. After an additional Master in Biomechanics, he served in the Air Force for two years and then joined the Faculty of the Department of Orthopaedics at Mayo. His curiosity, scientific interest, enthusiasm and endurance paired with an unconditional commitment to excellence in patient care have made him contribute to a great variety of orthopaedic problems of which his role of *Mister Elbow of the Planet* is certainly the most known. Although many have talents and skills, almost nobody has been able to make the impact of Dr. Morrey.

The Reinhold Ganz lectureship not only honors the exceptional scientific contributions of Bernard Morrey, but also the unique personality which has made these contributions possible and allowed Dr. Morrey to become one of the very, very rare, universally accepted and respected role model in modern orthopaedic surgery.
Thursday, May 7th

5th «Reinhold Ganz Lecture»

17:00 Welcome to the 5th «Reinhold Ganz Lecture»
   Prof. C. Gerber
