Preisträger Erste Freie Mitteilung
Lauréats première présentation libre

Jahr Année	Preisträger Lauréat	Titel Titre
2026	Linda Laely-Pedrazzoli	The impact of surgical timing for proximal femur fracture on functional recovery and quality of life at three months
2025	Dusan Petrovic	Comparative Effectiveness of Ray Amputation vs. Total Transmetatarsal Amputation in Patients with Diabetic Foot Osteomyelitis
2024	Giuseppe Loggia	Artificial Intelligence in Ultrasound for Real-Time Registration and Detection of Critical Structures in Foot and Ankle Surgery – A Comprehensive Ex-vivo Human Specimen Dataset
2023	Silvia Duschek	Intraoperative 3D-fluoroscopy increases accuracy of syndesmotic reduction in ankle fractures with syndesmotic instability
2022	Sabrina Weber	Diabetic and non-diabetic charcot neuroosteoarthropathy demonstrate similar clinical courses
2021	Keine Verleihung / Pas d'attribution	
2020	Keine Verleihung / Pas d'attribution	
2019	Silvan Hess Maurits Olthof	Current TKA alignment concepts do not aim to achieve the native coronal alignment of a patient The immunomodulary effect of controlled BMP-2 release
2018	*Lizzy Weigelt*	Midterm clinical and radiological outcome after autologous matrix-induced chondrogenesis (AMIC) for osteochondral lesions of the talus
2017	Adrian Schneider	Two year comparison of clinical and graft outcomes in patients undergoing tibiofemoral or patellofemoral Matrix-induced Autologous Chondrocyte Implantation (MACI)
2016	Keine Preisverleihung Erste Freie Mitteilung – Kongress EFORT Genf	
2015	Stefanie Hirsiger	Corrective osteotomies of phalangeal and metacarpal malunions using patient-specific guides: CT-based accuracy evaluation
2014	Diana Rudin	The anatomical course of the lateral femoral cutaneous nerve with special attention to anterior approach to hip joint

2013	Friederike Krupp	The ventral latissimus dorsi transfer for irreparable subscapularis tears: a cadaveric study with anatomical aspects
2011	Marko Kralkevic; Valentin Zumstein	Mineralisation and mechanical strength of the subchondral bone plate of the gelnohumeral joint
	Daniel Andreas Müller	A high pelvic incidence and low lumbar lordosis predispose to adjacent segment degeneration after lumbar spinal fusion
	Michael Betz	Vastus lateralis advancement for irreparable hip abductor tears: clinical and radiological outcome
2010	Philippe Tscholl	Radiographic assessment of the femoral tunnel entrance area prior to anterior cruciate ligament revision surgery
	Christoph Emanuel Albers	10-year follow-up of Bernese periacetabular osteotomy
	Stefan Zimmermann	Prevention of heterotopic ossification – new approaches
2009	Kathrin Kleinert	Closed suction drainage with autologous retransfusion of filtered shed blood does not offer advantages in primary non cemented minimally invasive total hip replacement: a prospective randomized trial
	Adrien Ray	Measuring femoral anteversion using 3d reconstruction
	Harald Lengnick	Expression of neuropilins and vascular endothelial growth factor and its receptors in human and dog osteosarcoma
	Davide Salvo	Functional and radiological outcome 10 to 20 years after ankle ORIF
2008	Victoria Duthon	Chronic achilles tendinopathy treated with gastrocnemius recession: a prospective case series
	Lars Clarfeld	Cuffs as a potential risk for patient contamination in orthopaedic surgery
	Rahel Schmid	

		Varus and valgus forces during knee arthroscopy: a possible reason for osteonecrosis of the femoral condyle?
2007	Petra Heil	Rare diaphyseal lesions of the ulna: surgical treatment considerations
